CompResults Managed Care Becomes New Program Administrator

At CISAP, we're dedicated to assisting you with the implementation of the safest and most efficient work conditions possible. That's why we're pleased to announce the addition of CompResults Managed Care as CISAP's new program administrator, effective October 1. This seamless transition will allow for our customers to experience the same service you've come to expect from CISAP, but with added features and convenience.

Based in Kansas City, CompResults Managed Care has established itself with employers and medical providers throughout the five-state region of Kansas, Missouri, Iowa, Nebraska and Illinois since 1992 as a dedicated leader in providing the most efficient and accurate drug screening services possible. In fact, CompResults has created enhanced and customized software especially for CISAP customers to track and manage members' screening information.

"The entire CompResults team looks forward to providing all the services CISAP members have experienced in the past, but with new and more convenient program offerings," said Jim Weir, CompResults President. "I am certain this new relationship will allow CISAP members to enjoy both superior testing services and unsurpassed accurate results."

The most noticeable program enhancement CISAP members will experience with CompResults is a dedicated personal contact who is responsible for managing all CISAP information and member inquiries. For your convenience, this person will be available by e-mail, telephone and fax to ensure you receive the quickest and most efficient service possible. In addition, the CompResults program will feature enhanced on-site drug screening capabilities to increase the ease of on-site testing.

"I look forward to beginning this relationship with CompResults, which I am certain will bring added benefits for all CISAP customers," said Brad Patten, CISAP Executive Director of Operations. "I encourage you to contact me with any comments or suggestions that you feel will further enhance your experience with CISAP and CompResults."

For more information about CompResults, as well as a new list of network collection locations, logon to www.cisap.net or watch for future communication by mail.
